Black Mesa Uranium Claims

Leased By

Klaner & Associates

Navajo Indian Reservation Apache Co, Ariz.

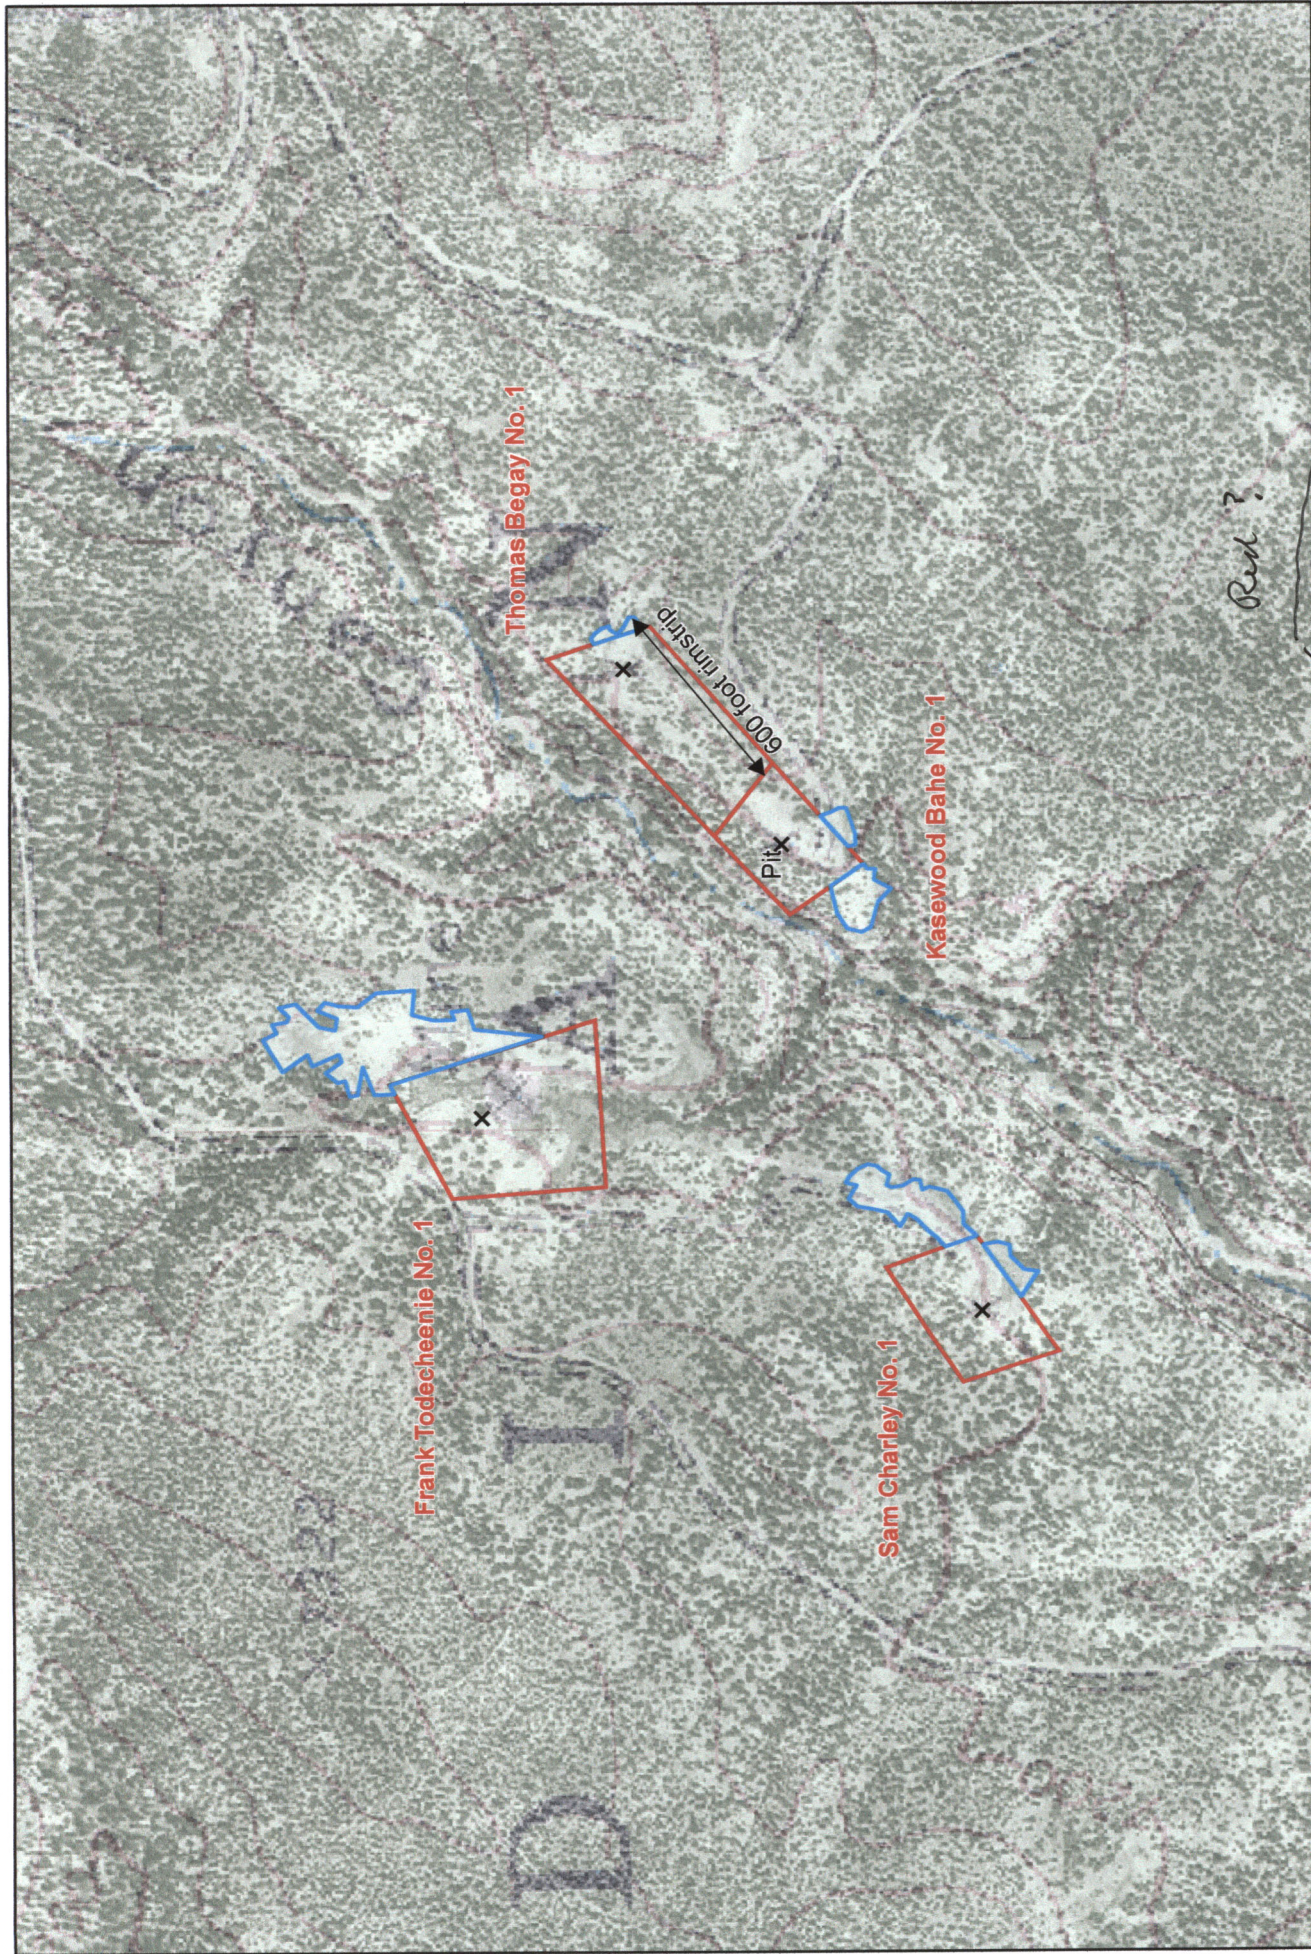

Land Use District No. 4

Scale 1" = 800 ft.

Jan. 6, 1955

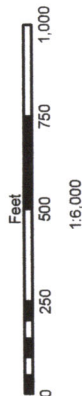

Looks OK. See claim map.
Sorry I don't have a letter copy
so you can read all notes
that were penciled in.

O's may refer to stockpiled ore.
Check the certification info I
sent you earlier, to see what it says.

1. Are the yellow outline areas reasonable extensions to fully outline each AUM? 2. We know that T Begay No. 1 & K Bahe No. 1 are contiguous. Is the Thomas Begay No. 1 the northern of the two?
3. Is the split between the T Begay No. 1 & K Bahe No. 1 mines reasonable? It is based on Scarborough description of the T Begay No. 1 being a 600ft rim strip.

Kasewood Bahe No. 1
 Thomas Begay No. 1
 Frank Todecheenie No. 1
 Sam Charley No. 1

USGS DOQQs with a transparent topo map overlay are portrayed for the Upper Waterfall Spring Canyon area. The red boxes are AUMs based on Navajo AML reclamation projects. The light blue outlined areas are areas of probable surface disturbance related to the AUMs.
